

Construction of a water well - Kenya / Completed Campaign

2014-02-19

Like other initiatives in previous years, AMU organized a dinner to collect funds to send to Kenya. In 2009, the theme was water and the funds were needed to build a well, as was explained: *“Water is a precious good. We feel it mostly when there is not enough water! But we can mend this situation: dig a borehole and bring that precious liquid to the surface! This is what we are going to do in Uthiru, on the outskirts of Nairobi – Kenya. It will bring the population some relief towards the daily lack of water in the taps. But it will also be used by a school and for agriculture”*. The fundraising process lasted until the end of 2009, due to the importance of this initiative.
