

Help for the reconstruction of windmills/ Kenya / Completed Campaign

2014-02-21

One of the greatest difficulties of the rural communities around Nairobi is to be able to find the necessary means to operate the old windmills or to build new ones in order to grind the corn they produce so that they have flour to make bread.

AMU has already contributed towards the construction of one of these mills and is planning to help in building other windmills during this year. Another initiative consists in buying and carrying the corn from those communities with a bigger crop to those with less cereal.
