

Process of special legalisation of immigrants

2014-02-25

From July to December 1996 we conducted awareness campaigns in the run-down neighbourhoods of the outskirts of Algés. We organised 6 or 7 groups of 3,4 people each, half from our team of collaborators and the other half from people living in those neighbourhoods. Many brochures and posters on this theme were provided by the government and distributed among immigrants. The reception of families was very positive, bringing great courage and a strong motivation for many people to solve their irregular situation and to make others aware of the importance and the opportunity of this process of special legalisation.
