

Corporate Social Responsibility

2014-03-12

What is the Corporate Social Responsibility ?

Corporate social responsibility consists in the voluntary integration of social and environmental concerns in their operations and in their interaction with all those involved. Therefore, companies satisfy their clients' needs and simultaneously manage the expectations of the workers, the suppliers and the local community. It is about contributing, in a positive way, to society and to manage the environmental impacts of the company, which may bring direct benefits to the business and maintain competition in the long run.
